Release Notes

Join Us.. You are not alone

Version 1.0

Installation steps

This brief tutorial assumes you have node.js and npm installed in your development environment or server. The node version is 8.0+ and npm version is 5.0+.

Step 1: Unzip the zip (or tar).

Step 2: Navigate to the folder where you unzipped.

Step 3: Open a terminal there.

Step 4: Type "npm install" without quotes

Step 5: Type "npm start" without quotes

Step 6: If you want to test this code in a terminal (already navigated to working directory) type "npm test" without quotes

Release Features

Following are the features provided by this release (version 1.0).

Feature #1

Find nearby counselor: Enable clients to locate counselors who are near them. This feature takes in the exact location of the client from the browser (only after client gives the permission) and grabs only those counselors who are physically near him.

The client may also put in some keywords such as name of counselor or location and the system will find counselors who have these keywords.

Feature #2

Request meeting: This feature enables the client to request a meeting with the peer motivator. The system shall ask for a date and a time range for the meeting and shall automatically assign a peer motivator to the client based on his/her availability or else it would show an error that no counselor is available at that day and that time slot.

Feature #3

Video chat: The client and peer motivator shall talk to one another with hubl (a video chat platform). The client shall have 30 minutes to talk to the peer motivator.

Feature #4

Client History: The peer motivator shall be able to take notes about the client and maintain the client history. These notes can be accessed by the peer motivator while talking to the client to know about the earlier conversations.

Enhancements

These are the features which we think needs enhancements in some way.

Enhancement #1

The UI of the application needs improvement. The UI currently is too basic.

Enhancement #2

If a client is already talking to a peer motivator then the client should be allowed to talk to that peer motivator in the subsequent session and not a new peer motivator.

Enhancement #3

Need to show the details of the peer motivator to the client once appointment if fixed.

Fixed

These are the list of issues fixed from the previous release. The issues can be found from this link (https://github.com/bisho1995/join-us-design-lab/issues?q=is%3Aissue+is%3Aclosed).

Fix #1

There was no authentication in place to allow role based feature updates.

Issue(s) #15, #16

Fix #2

Short password getting accepted and confirm password not working.

Issue(s) #21, #22, #23

Fix #3

Client is able to book a session from the past.

Issue(s) #27
